		Canadian Overview Tables	Basic Cross-tabulations	Special Interest Cross-tabulations	Profile Components	Print Profiles	Community Profiles		Dissolved CSD Profile
Major Characteristics	National Overview Tables Geographic distribution of Canada's population and dwellings at various levels of geography.	Tabulations to support 8 major variable releases. Gives a picture of Canada, Provinces/Territories and Metropolitan Areas. Many tables include historical perspective from previous censuses.	Provides small area information. Series of tabulations featuring 3 to 4 inter-related variables at detailed levels of geography.	Special Interest Tables: Cross-tabulations showing analytical depth of census information. Special Interest Profiles: Cross-tabulations with embedded univariates for subpopulations and special interest topics.	Each variable release forms a component of the complete cumulative profile (approximately 1,700 data points).	CSD Profile (approximately 500 data points) CT Profile (approximately 500 data points)	Readily available community snapshots updated per each of the 8 releases. Designed to present a profile for all Canadian communities. A mapping feature is available for viewing the location of a community within Canada. Planned increase from the current 75 data points.	Equivalent to 1,700 data point complete cumulative profile for all CSDs whose boundaries were dissolved between 1996 and 2001.	Microdata file with access to non-aggregated data. TBD
